European Journal of Soil Science

Volume 52 (2001)

Subject index

abandoned anthills of *Formica polyctena* and soil heterogeneity in a temperate deciduous forest: morphology and organic matter composition, 355
acid Sodosol in southeastern Australia, seasonal differences in the soil water balance under perennial and annual pastures on an, 227
acidic and alkaline hydrolysis, origin and nature of organic nitrogen in soil as assessed by, 575
Acrisols of western Spain, estimation of phosphate adsorption by, from electrical conductivity of potassium dihydrogen phosphate extracts of soil, 139
adapted maximal overlap discrete wavelet transform, analysis of changes in variance and correlation of soil properties with scale and location using, 547
aging biosolids, effect of, on the availability of cadmium and zinc in soil, 313
alkaline saline soils of the former Lake Texcoco, simulating the dynamics of glucose and NH_4^+ in, with the Detran model, 269
aluminium, interactions of fulvic acid with: the contribution of E-horizon eluates to podzolization, 177
aluminium solubility
  mechanisms in moderately acid Bs horizons of podzolized soils, 655
  modelling, in European forest soils, 189
ammonium oxidation, effects of lanthanum and mixtures of rare earths on, 323
anion adsorption on oxide minerals and an allophane-containing soil, modelling competitive, 639
annual and perennial pastures, nitrate leaching loss under, with and without lime on a duplex (texture contrast) soil in humid southeastern Australia, 237
application of a two-dimensional model to simulate flow and transport in a macroporous agricultural soil with tile drains, 433
arable cropping, losses of carbon and nitrogen with prolonged, from sandy soils of the South African Highveld, 93
atmospheric CO_2 enrichment, effects of, on carbon sequestration in forest soils, 619
Australia
  nitrate leaching loss under annual and perennial pastures with and without lime on a duplex (texture contrast) soil in humid southeastern, 237
  seasonal differences in the soil water balance under perennial and annual pastures on an acid Sodosol in southeastern, 227

base cation leaching from the forest floor under six North American tree species, effect of organic acids on, 205
biogeochemical cycle of silicon in the soil and litter of a temperate forest, ultrastructural study of the, 385
blanket peat bog in northern England, ionic concentrations in a, and correlations with deposition and climate variables, 69
Book reviews, 167, 521
British swelling soils, re-evaluation of the structural properties of some, 469
bromide, facilitated transport of, in sandy soil: effect of suspended soil material and pig slurry on, 287
bulk density of a Grey Clay subsoil, increase in, by infilling of cracks by topsoil, 37

^{13}C-NMR dipolar dephasing experiments, solid-state, for quantifying protonated and non-protonated carbon in soil organic matter and model systems, 103
cadmium in soil, effect of aging biosolids on the availability of, 313
capillary rise method, measurement of the wettability of organic materials in relation to water content by the, 459
carbon, losses of, with prolonged arable cropping from sandy soils of the South African Highveld, 93
carbon sequestration in forest soils: effects of soil type, atmospheric CO_2 enrichment, and N deposition, 619
cation exchange resin to study soil processes *in situ* in a toposequence of Luvisol and Cambisol on loess, 397
cations, the Gapon Exchange constant in a soil with mono- and divalent, 1
CH_4, new sampling technique to monitor concentrations of, in air at well-defined depths in soils with varied water potential, 297
clay–sand mixtures, effect of sodium adsorption ratio and electrolyte concentrations on the saturated hydraulic conductivity of, 449
climate variables, correlations of, with ionic concentrations in a blanket peat bog in northern England, 69
CO_2, new sampling technique to monitor concentrations of, in air at well-defined depths in soils with varied water potential, 297
compaction, effect of, on the porosity of a silty soil, 49
concentrations of 60 elements in the soil solution as related to the soil acidity, 151
correlations with deposition and climate variables of ionic concentrations in a blanket peat bog in northern England, 69
Cr(III) adsorption on modified montmorillonites, factors controlling, 683

deposition, correlations of, with ionic concentrations in a blanket peat bog in northern England, 69
description and classification of soil structure using distance transform data, 529
design of porous material sensors to measure the matric potential of water in soil, 511
determination of exchangeable potassium in soil using ion-selective electrodes in soil suspensions, 143
determination of the free ion concentration of trace metals in soil solution using a soil column Donnan membrane technique, 629
Detran model, simulating the dynamics of glucose and NH_4^+ in alkaline saline soils of the former Lake Texcoco with the, 269
dissolved organic carbon in shallow forest soils, isotopic fractionation of, as affected by sorption, 585
dissolved organic matter in Podzol B horizons, retention and release of, 409
dissolved organic phosphorus and sulphur as influenced by sorptive interactions with mineral subsoil horizons, 489

© 2001 Blackwell Science Ltd

distance transform data, description and classification of soil structure using, 529
Donnan membrane technique (soil column), determination of the free ion concentration of trace metals in soil solution using a, 629
double-layer theory, application of, to drainage, drying and wetting, 1
drainage, application of double-layer theory to, 1
drying, application of double-layer theory to, 1
duplex (texture contrast) soil in humid southeastern Australia, nitrate leaching loss under annual and perennial pastures with and without lime on a, 237

earthworms, three-dimensional trajectories of ^{60}Co-labelled, in artificial cores of soil, 365
effect of aging biosolids on the availability of cadmium and zinc in soil, 313
effect of compaction on the porosity of a silty soil, 49
effects of lanthanum and mixtures of rare earths on ammonium oxidation and mineralization of nitrogen in soil, 323
effect of organic acids on base cation leaching from the forest floor under six North American tree species, 205
effects of rock fragment cover on soil infiltration, interrill runoff and erosion, 59
effect of sodium adsorption ratio and electrolyte concentrations on the saturated hydraulic conductivity of clay–sand mixtures, 449
effect of suspended soil material and pig slurry on the facilitated transport of pesticides, phosphate and bromide in sandy soil, 287
effects of temperature, water-filled pore space and land use on N_2O emissions from an imperfectly drained gleysol, 667
E-horizon eluates, the contribution of, to podzolization, 177
electrical conductivity of potassium dihydrogen phosphate extracts of soil, estimation of phosphate adsorption by Acrisols of western Spain from, 139
electrolyte concentrations, effect of, on the saturated hydraulic conductivity of clay–sand mixtures, 449
England, northern, ionic concentrations in a blanket peat bog in, and correlations with deposition and climate variables, 69
erosion, effects of rock fragment cover on, 59
estimation of phosphate adsorption by Acrisols of western Spain from electrical conductivity of potassium dihydrogen phosphate extracts of soil, 139
estimation of the phosphorus sorption capacity of acidic soils in Ireland, 479
European forest soils
  modelling pH buffering and aluminium solubility in, 189
  modelling the solid–solution partitioning of organic matter in, 215
evaluation of a nitrogen transport and transformation model in a bare soil, 253
exchangeable potassium in soil, determination of, using ion-selective electrodes in soil suspensions, 143
experimental *in situ* transformation of vermiculites to study the weathering impact of tree species in the soil, 81

facilitated transport of pesticides, phosphate and bromide in sandy soil, effect of suspended soil material and pig slurry on, 287
flow and transport in a macroporous agricultural soil with tile drains, application of a two-dimensional model to simulate, 433
forest floor, effect of organic acids on base cation leaching from, under six North American tree species, 205
forest soils, carbon sequestration in: effects of soil type, atmospheric CO_2 enrichment, and N deposition, 619
Formica polyctena, abandoned anthills of, and soil heterogeneity in a temperate deciduous forest, 355
fractionation (physical) of soil, and structural and functional complexity in organic matter turnover, 345
free ion concentration of trace metals in soil solution, determination of, using a soil column Donnan membrane technique, 629
fulvic acid, interactions of, with aluminium and a proto-imogolite sol: the contribution of E-horizon eluates to podzolization, 177

Gapon Exchange constant in a soil with mono- and divalent cations, 1
gas exchange between soil and the atmosphere, vents and seals in non-steady-state chambers used for measuring, 675
gleysol, effects of temperature, water-filled pore space and land use on N_2O emissions from an imperfectly drained, 667
glucose, simulating the dynamics of, in alkaline saline soils of the former Lake Texcoco with the Detran model, 269
goethite, sorption of iron-cyanide complexes on, 121
Grey Clay subsoil, increase in the bulk density of, by infilling of cracks by topsoil, 37

heteronuclear and multidimensional NMR spectroscopy of humic substances, interpretation of, 495
humic substances, interpretation of heteronuclear and multidimensional NMR spectroscopy of, 495
humus composition of soils under forest, coffee and arable cultivation in hilly areas of south Sumatra, Indonesia, 599

infiltration experiments, non-equilibrium water flow characterized by means of, 13
influence of the rhizosphere on microbial biomass and recently formed organic matter, 377
interactions of fulvic acid with aluminium and a proto-imogolite sol: the contribution of E-horizon eluates to podzolization, 177
interpretation of heteronuclear and multidimensional NMR spectroscopy of humic substances, 495
interrill runoff, effects of rock fragment cover on, 59
ionic concentrations in a blanket peat bog in northern England and correlations with deposition and climate variables, 69
ion-selective electrodes in soil suspensions, determination of exchangeable potassium in soil using, 143
Ireland, estimation of the phosphorus sorption capacity of acidic soils in, 479
iron-cyanide complexes, sorption of, on goethite, 121
isotopic fractionation of dissolved organic carbon in shallow forest soils as affected by sorption, 585

Lake Texcoco (former), simulating the dynamics of glucose and NH_4^+ in alkaline saline soils of, with the Detran model, 269
land use, effects of, on N_2O emissions from an imperfectly drained gleysol, 667
lanthanum, effects of, on ammonium oxidation and mineralization of nitrogen in soil, 323
laser-induced breakdown spectroscopy for soil diagnostics, 305
loess, soil processes *in situ* in a toposequence of Luvisol and Cambisol on, 397
long-term field experiment, response of sorption processes of MCPA to the amount and origin of organic matter in a, 279
losses of carbon and nitrogen with prolonged arable cropping from sandy soils of the South African Highveld, 93

macroporous agricultural soil with tile drains, application of a two-dimensional model to simulate flow and transport in a, 433
matric potential of water in soil, design of porous material sensors to measure, 511
MCPA, response of sorption processes of, to the amount and origin of organic matter in a long-term field experiment, 279
measurement of the wettability of organic materials in relation to water content by the capillary rise method, 459
microbial biomass, influence of the rhizosphere on, 377
mineral subsoil horizons, dissolved organic phosphorus and sulphur as influenced by sorptive interactions with, 489
mineralization of nitrogen, effects of lanthanum and mixtures of rare earths on, 323
Minutes of the Advisory Committee, 175
mixtures of rare earths, effects of, on ammonium oxidation and mineralization of nitrogen in soil, 323
modelling
  competitive anion adsorption on oxide minerals and an allophane-containing soil, 639
  multiple tracer transport through soil columns: effects of initial moisture and mode of application, 25
  pH buffering and aluminium solubility in European forest soils, 189
  soil processes, non-linearity and error in, 129

the solid–solution partitioning of organic matter in European forest soils, 215
montmorillonites, factors controlling the adsorption of Cr(III) on modified, 683

influence of the rhizosphere on recently formed, 377
modelling the solid–solution partitioning of, in European forest soils, 215
response of sorption processes of MCPA to the amount and origin of, in a long-term field experiment, 279
turnover, physical fractionation of soil and structural and functional complexity in, 345
organic nitrogen in soil, origin and nature of, as assessed by acidic and alkaline hydrolysis, 575

pedotransfer functions for solute transport parameters of Portuguese soils, 563
perennial and annual pastures on an acid Sodosol in southeastern Australia, seasonal differences in the soil water balance under, 227
pesticides, facilitated transport of, in sandy soil: effect of suspended soil material and pig slurry on, 287
pH buffering, modelling, in European forest soils, 189
phosphate
adsorption by Acrisols of western Spain, estimation of, from electrical conductivity of potassium dihydrogen phosphate extracts of soil, 139
facilitated transport of, in sandy soil: effect of suspended soil material and pig slurry on, 287
phosphorus
dissolved organic, as influenced by sorptive interactions with mineral subsoil horizons, 489
sorption capacity of acidic soils in Ireland, estimation of, 479
physical fractionation of soil and structural and functional complexity in organic matter turnover, 345
pig slurry, effect of, on the facilitated transport of pesticides, phosphate and bromide in sandy soil, 287
Podzol B horizons, retention and release of dissolved organic matter in, 409
podzolization, the contribution of E-horizon eluates to, 177
podzolized soils, aluminium solubility mechanisms in moderately acid Bs horizons of, 655
porosity of a silty soil, effect of compaction on, 49
porous material sensors to measure the matric potential of water in soil, design of, 511
Portuguese soils, pedotransfer functions for solute transport parameters of, 563
preferential flow paths, sorption and transport of metals in, after the addition of wood ash, 423
proto-imogolite sol, interactions of fulvic acid with: the contribution of E-horizon eluates to podzolization, 177
protonated and non-protonated carbon in soil organic matter and model systems, solid-state ^{13}C-NMR dipolar dephasing experiments for quantifying, 103

rare earths, effects of mixtures of, on ammonium oxidation and mineralization of nitrogen in soil, 323
re-evaluation of the structural properties of some British swelling soils, 469
Referees for 2000, 341
response of sorption processes of MCPA to the amount and origin of organic matter in a long-term field experiment, 279
retention and release of dissolved organic matter in Podzol B horizons, 409
rhizosphere, influence of the, on microbial biomass and recently formed organic matter, 377
rock fragment cover, effects of, on soil infiltration, interrill runoff and erosion, 59

sandy soil
effect of suspended soil material and pig slurry on the facilitated transport of pesticides, phosphate and bromide in, 287
of the South African Highveld, losses of carbon and nitrogen with prolonged arable cropping from, 93
saturated hydraulic conductivity of clay–sand mixtures, effect of sodium adsorption ratio and electrolyte concentrations on, 449
seasonal differences in the soil water balance under perennial and annual pastures on an acid Sodosol in southeastern Australia, 227
silicon, ultrastructural study of the biogeochemical cycle of, in the soil and litter of a temperate forest, 385
silty soil, effect of compaction on the porosity of a, 49
simulating the dynamics of glucose and NH_4^+ in alkaline saline soils of the former Lake Texcoco with the Detran model, 269
sodium adsorption ratio, effect of, on the saturated hydraulic conductivity of clay–sand mixtures, 449
soil acidity, concentrations of 60 elements in the soil solution as related to, 151
soil aggregates, sources and composition of soil organic matter fractions between and within, 607
soil diagnostics, laser-induced breakdown spectroscopy for, 305
soil heterogeneity in a temperate deciduous forest, abandoned anthills of *Formica polyctena* and, 355
soil infiltration, effects of rock fragment cover on, 59
soil matrix, sorption and transport of metals in, after the addition of wood ash, 423
soil organic matter, solid-state ^{13}C-NMR dipolar dephasing experiments for quantifying protonated and non-protonated carbon in, 103
soil processes *in situ* in a toposequence of Luvisol and Cambisol on loess, cation exchange resin and test vermiculite to study, 397
soil properties, changes in variance and correlation of, with scale and location: analysis using an adapted maximal overlap discrete wavelet transform, 547
soil structure, description and classification of, using distance transform data, 529
soil type, effects of, on carbon sequestration in forest soils, 619
soil water balance under perennial and annual pastures on an acid Sodosol in southeastern Australia, seasonal differences in the, 227
soils under forest, coffee and arable cultivation in hilly areas of south Sumatra, Indonesia, humus composition of, 599
solid–solution partitioning of organic matter in European forest soils, modelling the, 215
solid-state ^{13}C-NMR dipolar dephasing experiments for quantifying protonated and non-protonated carbon in soil organic matter and model systems, 103
solute transport parameters of Portuguese soils, pedotransfer functions for, 563

sorption
of iron-cyanide complexes on goethite, 121
isotopic fractionation of dissolved organic carbon in shallow forest soils as affected by, 585
of metals in preferential flow paths and soil matrix after the addition of wood ash, 423
sorption processes of MCPA, response of, to the amount and origin of organic matter in a long-term field experiment, 279
sources and composition of soil organic matter fractions between and within soil aggregates, 607
South African Highveld, losses of carbon and nitrogen with prolonged arable cropping from sandy soils of the, 93
Spain, western, estimation of phosphate adsorption by Acrisols of, from electrical conductivity of potassium dihydrogen phosphate extracts of soil, 139
spectroscopy, laser-induced breakdown, for soil diagnostics, 305
statistics to support soil research and their presentation, 331
structural and functional complexity in organic matter turnover, physical fractionation of soil and, 345
structural properties of some British swelling soils, re-evaluation of the, 469
sulphur, dissolved organic, as influenced by sorptive interactions with mineral subsoil horizons, 489
Sumatra (south), Indonesia, humus composition of soils under forest, coffee and arable cultivation in hilly areas of, 599
suspended soil material, effect of, on the facilitated transport of pesticides, phosphate and bromide in sandy soil, 287

temperate deciduous forest, abandoned anthills of *Formica polyctena* and soil heterogeneity in a, 355
temperate forest, ultrastructural study of the biogeochemical cycle of silicon in the soil and litter of a, 385
temperature, effects of, on N_2O emissions from an imperfectly drained gleysol, 667
test vermiculite to study soil processes *in situ* in a toposequence of Luvisol and Cambisol on loess, 397
three-dimensional trajectories of ^{60}Co-labelled earthworms in artificial cores of soil, 365
tile drains, application of a two-dimensional model to simulate flow and transport in a macroporous agricultural soil with, 433
toposequence of Luvisol and Cambisol on loess, cation exchange resin to study soil processes *in situ* in a, 397
topsoil, increase in the bulk density of a Grey Clay subsoil by infilling of cracks by, 37
transport of metals in preferential flow paths and soil matrix after the addition of wood ash, 423
tree species
effect of organic acids on base cation leaching from the forest floor under six North American, 205
experimental *in situ* transformation of vermiculites to study the weathering impact of, 81
two-dimensional model to simulate flow and transport in a macroporous agricultural soil with tile drains, 433

ultrastructural study of the biogeochemical cycle of silicon in the soil and litter of a temperate forest, 385
unsaturated hydraulic properties, influence of compaction on, 49

vents and seals in non-steady-state chambers used for measuring gas exchange between soil and the atmosphere, 675
vermiculites, experimental *in situ* transformation of, to study the weathering impact of tree species in the soil, 81

water content, measurement of the wettability of organic materials in relation to, by the capillary rise method, 459
water flow, non-equilibrium, characterized by means of upward infiltration experiments, 13
water in soil, design of porous material sensors to measure the matric potential of, 511
water potential, new sampling technique to monitor concentrations of CH_4, N_2O and CO_2 in air at well-defined depths in soils with varied, 297
water-filled pore space, effects of, on N_2O emissions from an imperfectly drained gleysol, 667
weathering impact of tree species in the soil, experimental *in situ* transformation of vermiculites to study, 81
wettability of organic materials, measurement of, in relation to water content by the capillary rise method, 459
wetting, application of double-layer theory to, 1
wood ash, sorption and transport of metals in preferential flow paths and soil matrix after the addition of, 423

zinc in soil, effect of aging biosolids on the availability of, 313
